

## SPORTWALL INTERACTIVE BACKBOARDS

### INTERACTIVE SPORTS TRAINING BACKBOARDS WITH NONCOMPUTERIZED PANELS

This interactive sports training system uses cutting edge technology to provide a new dimension in training. Each system includes a patented sand-filled feature that ensures a quiet backboard session. Made of the best materials available, these backboards are strong, lightweight and highly durable. All backboards include an 85 degree backslope for maximum ball performance. All components are made of schedule 40 galvanized steel, and all systems include a 4' H catch net to keep high balls in play.

**THE TRAINER SERIES** is made of a proprietary material blend of Forton MG (fiberglass reinforced gypsum) with a rigid epoxy bound core. Available either 8' or 10'H.
