CROWD CONTROL FENCING**

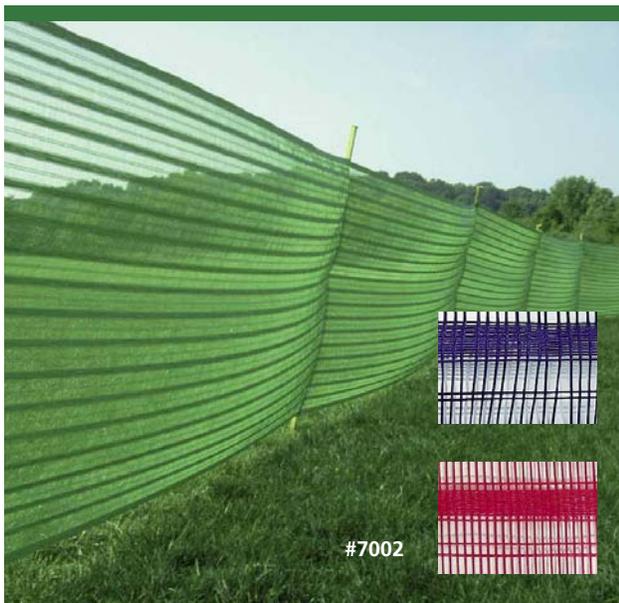

Effective and inexpensive crowd control, especially useful during sporting events. Heavy-duty green polyethylene twisted cord combines unobtrusive appearance with maximum strength. Crowd Control netting is bound on top with yellow vinyl-coated tape. Available in 4', 5' or 6' heights and lengths up to 300'. 38 s.f./lb.

**#7015
FENCE-ALL KNITTED FENCING**

Will not rust, rot or mildew. Lightweight for easy handling and storage. Constructed of flexible, knitted UV-stabilized olefin. Economical and reusable. Rolls of 46" x 150'. Green, Orange, Red. 12 lbs.

**#7020
SPORTS FENCE**

Great for crowd control at events and facilities. Heavy duty. Highly visible. UV stabilized for long-term installation. Mesh of 3/8" allows wind flow. Colors: Blue, Green, Orange, Red. Size: 4' x 150'. Shipping Weight: 24 lbs.

QUIK FENCE™**

Strong, heat-finished vinyl-coated polyester fencing is ideal for crowd control, course delineation and boundary marking. Rolls of 46" x 150'. Black, Blue, Green, Purple, Red, Yellow. Other colors available on request. 27 lbs.

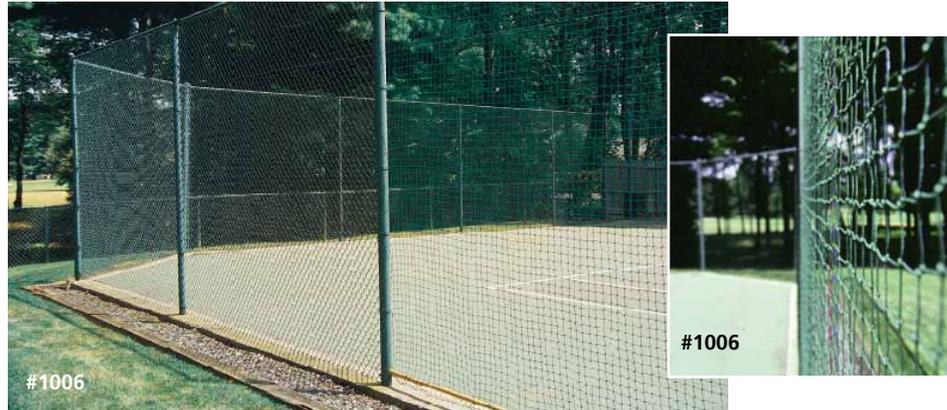

HOW TO INSTALL FABRIC FENCING

1. Wood posts: 4" x 4" posts made of treated wood are suitable for end posts. Smaller sized posts work well between end posts. Place them approximately every 10 feet on center.
2. Typically a 1/8" cable is used as the top support. To secure the netting to the cable, use hog rings or lace every other mesh. The bottom of the Fabric Fencing can be secured to treated 2" x 4" wood or 1/8" cable. To secure netting to wood posts, use staples every other mesh. Make sure not to drive the staples in so far that they cut the netting.
3. If steel posts are specified, 1 5/8" outside diameter posts are suggested. To secure netting to steel posts, lace with twine or use Ty-raps.
4. For best results, Fabric Fencing should not be stretched taut, but allowed to have some "give" to it.

HOW TO INSTALL QUIK™ FENCE, FENCE-ALL AND SPORTS FENCE

1. Fencing is easily installed using wood, PVC or metal posts spaced 8' to 12' apart, depending on wind conditions. 6' posts are recommended to allow for the bottom 18" to be buried in the ground and a 6" gap from the bottom of the fence to the ground.
2. Our fencing is strong, and therefore it should be stretched tautly from post to post. The tops of end and corner posts should be tension tied to ground stakes.
3. Depending on the type of post used, fencing is easily installed with staples, Ty-raps or wire ties. When Ty-raps or wire ties are used, they should be placed so that they diagonally cross solid bands at several locations. See diagram at right..

Drawings are illustrative only and we accept no responsibility for their use.

#1006 COURTMASTER FABRIC FENCING

The ideal alternative to expensive chain-link fencing. Made of durable 1-3/4" mesh polyethylene netting (unbound), it's perfect for private tennis courts because it's aesthetically pleasing. Easy to attach to metal or wood poles. 10'H or 12'H x any length. Green. 38 sq. ft./lb.

#1001 10' X 60' PRE-CUT FABRIC FENCING 16 lbs.

#1002 10' X 120' PRE-CUT FABRIC FENCING 32 lbs.

#1010 CONSTRUCTION SITE FENCING

Lightweight, inexpensive fencing perfect for temporary use at construction sites. Made of woven polyethylene, hemmed and grommeted. Quick and easy installation. 68" x 150'. Black. 32 lbs.

PRIVACY SCREENS

Provide a visual barrier for building sites, factories, airports and residences. Simple and easy to install on chain link fences. Made of Green knitted polyethylene film with a reinforced selvage edge.

#3134 PRIVACY MASTER 44" x 150'. 25 lbs.

#3135 PRIVACY MASTER 68" x 150'. 32 lbs.

#3136 PRIVACY MASTER 92" x 150'. 53 lbs.

#1020 PRIVACY MASTER PLUS

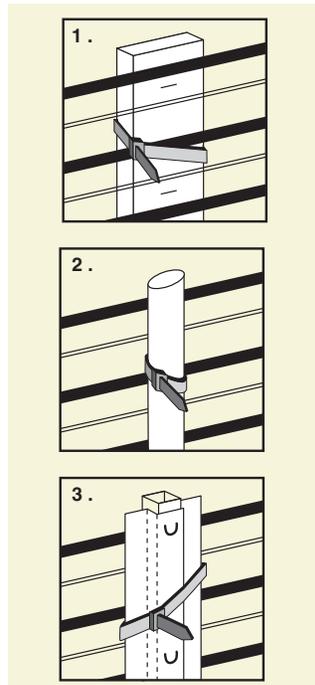

Same as Privacy Master except hemmed and grommeted. 41" x 150'. 24 lbs.

#1021 PRIVACY MASTER PLUS

Same as #1020 except 65" x 150'. 31 lbs.

#1022 PRIVACY MASTER PLUS

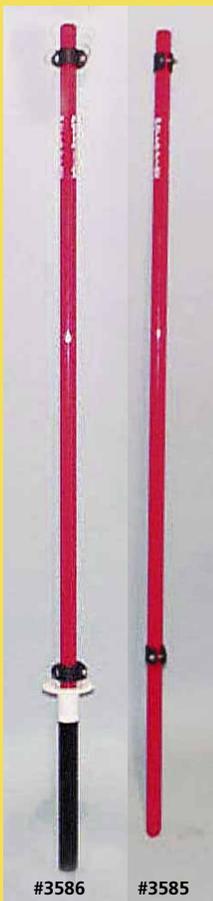

Same as #1020 except 89" x 150'. 52 lbs.

PERFECT FOR USE WITH ALL OUR FENCING FABRICS.

PORTA-FLEX™ FENCING SYSTEM

PORTA-FLEX™ FENCING SYSTEM

Porta-Flex is a heavy-duty pole and ground anchor system great for your most active areas. Made from UV-inhibited, impact-modified plastic, Porta-Flex bends to the ground and comes back straight time and time again. It can be installed with or without the convenient ground anchors.

#3583 PORTA-FLEX POLE SYSTEM
Heavy duty pole will handle low speed (15 mph) impact. Set of 16 poles with hooks. Easy installation. One set will support 150' of fencing. Blue, Green, Red. 23 lbs.

#3584 PORTA-FLEX GROUND ANCHORS

When combined with the pole system, allows convenient, daily set up and removal. Set of 16 anchors with plugs. 5 lbs.

#3585 Single Porta-Flex Pole 64" L. 2 lbs.

#3586 Single Porta-Flex Ground Anchor 14-1/2" L. 1/4 lb.

For best results, we recommend installation using carbide drill bits and a cordless drill.

SMARTPOLES™ FENCING SYSTEM

The Smartpoles™ system is designed for light duty use where bodily impact is unlikely. This system is an economical answer to many requirements, and installation can be done with the tools provided.

#3397 SMARTPOLES FENCING INSTALLATION SET with Sockets

Set of 16 pointed stakes (60" L) and 16 ground sockets (12" L).

Includes 14 Black stakes and 2 White end stakes.

Makes fence installation quick and easy using the included punch-pilot hole tool, socket setter, and installation sheet. Simply hang fencing on cleats (3 per stake) and adjust tension as needed.

One set is perfect for each 150' L roll of fencing (stakes placed at 10' intervals). 24 lbs.

Note: A standard roll of fencing fabric is 4'H x 150'L.

#3398 SMARTPOLES FENCING INSTALLATION SET without Sockets

Same as 3397 but without sockets. Great for temporary fencing. Simply drive the stakes into the ground at desired locations, hang fencing on cleats (3 per stake) and adjust tension as needed. 25 lbs.

#3399 SMARTPOLES GROUND SOCKETS SET

Provides ideal flexibility for multiple fence locations. 16 sockets (12"L), 16 yellow plugs, one socket setter, one pilot hole tool, installation sheet. 8 lbs.

#3406 60" L Smartpoles Single Fence Stake 3 lbs.

#3407 12" L Smartpoles Single Ground Socket 1/4 lb.
